DHC-6 Twin Otter	78
<u>COMMUNICATION AND NAVIGATION</u>	80
Communication by radio	82
Communicating through symbols on the ground	84
How is airspace organized?	86
How does an airplane navigate?	88
<u>THE FUTURE OF FLIGHT</u>	90
The Zeppelin	92
The flying car	94
The Son of Concorde	96

1903

WRIGHT FLYER

Maximum speed: 48 km/h (30 mph)

Weight: 274 kg (605 lb)

Length: 6.43 m (21 ft 1 in)

Wingspan: 12 m (40 ft 4 in)

1927

LEVASSEUR PL.8

Maximum speed: 193 km/h (120 mph)

Weight: 5,000 kg (11,023 lb)

Length: 9.75 m (32 ft)

Wingspan: 15 m (49 ft 3 in)

1934

RENAUD CAUDRON C.460

Maximum speed: 500 km/h (311 mph)

Weight: 875 kg (1,929 lb)

Length: 7.11 m (23 ft 4 in)

Wingspan: 6.75 m (22 ft 2 in)

1936

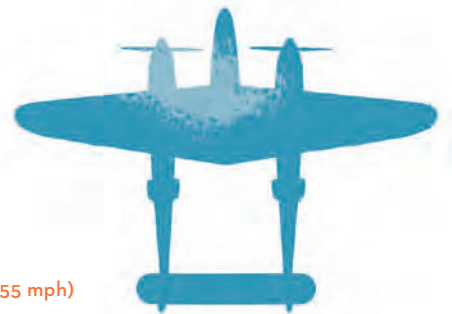

DFS HABICHT

Maximum speed: 250 km/h (155 mph)

Weight: 350 kg (772 lb)

Length: 6.58 m (21 ft 7 in)

Wingspan: 13.6 m (44 ft 7 in)

1939

LOCKHEED P-38

Maximum speed: 666 km/h (414 mph)

Weight: 7,938 kg (17,500 lb)

Length: 11.53 m (37 ft 10 in)

Wingspan: 15.85 m (52 ft)
